

BPA Breed Survey 2009 Instructions for on-line survey

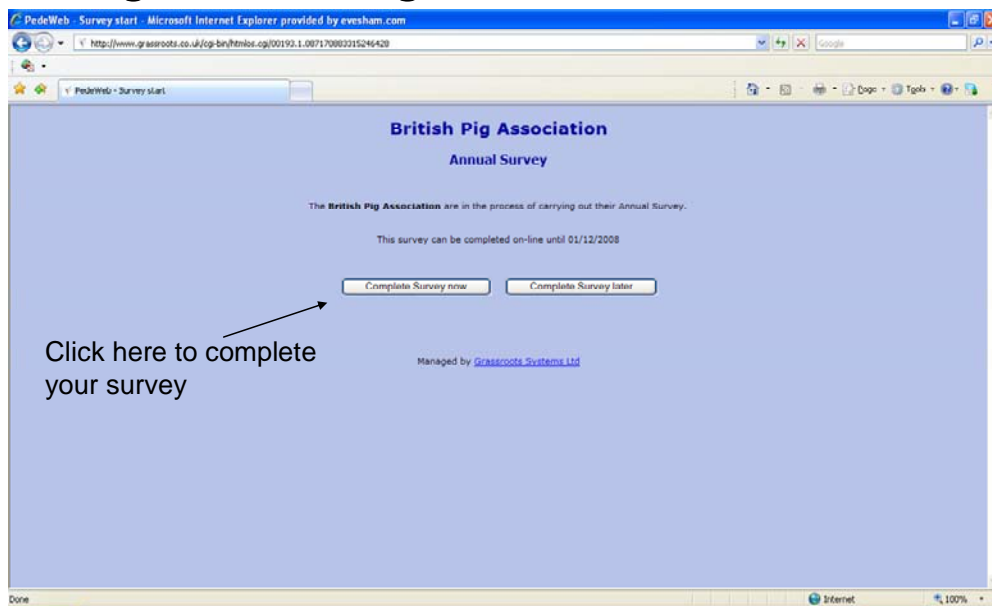

We need your help to update our records and get an accurate figure for the population of your breed.

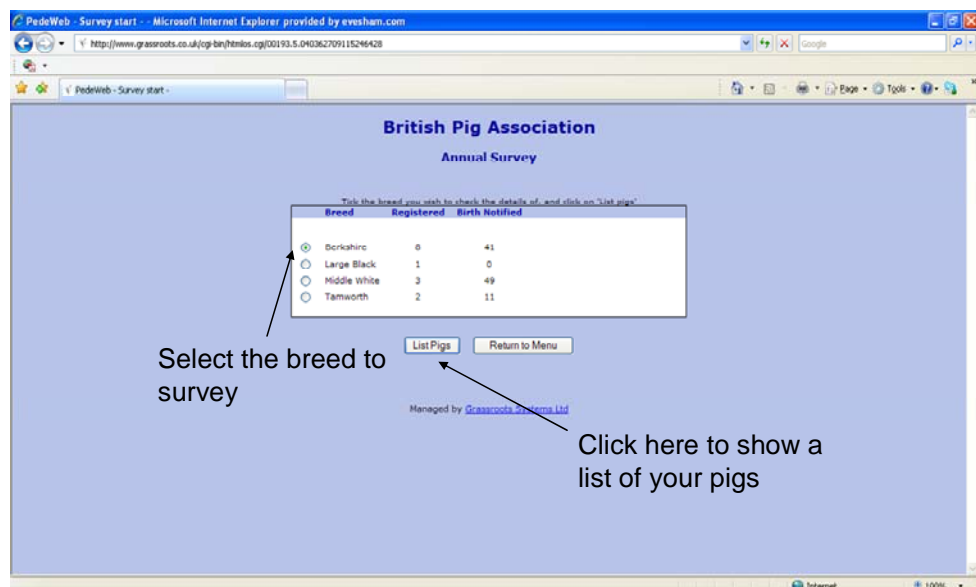

It is important that we know the size of the population but we also have to know how many pigs there are in each line within the breed. This information can then be used to by our new Breed Development and Conservation Committee to design conservation breeding programmes. It is no use identifying rarest sow so that she can be put into a contract breeding programme if it turns out that she is already dead.

Filling out your survey on-line is quick and easy and avoids the risk of forms being lost in the post. By completing the survey you are taking part in a conservation programme which has been running for over 30 years and has saved our native pig breeds from extinction.
